

Maths

Maths

Practise your number or line formation.

Count different objects in your house. For example can you find 2 spoons? Or 15 shoes? Simple single digit addition using everyday objects.

Go up and down stairs, counting how many stairs there are. Or counting your steps walking from one side of the room to another. What is one more/less? Two more/less?

See if you can find objects that are big and small/long and short/little or large.

Can you find things in your house that are different colours? How many colours can you find?

Listen to number or shape songs on the Ipad/TV/computer.

Can you find any shapes in your house? Focus on finding squares, triangles or circles.

See if you can put different objects in your house in, on and under. Use chairs/cups/plates to help you put the object in the correct position.
